

Solution: Working with Forms

Here is the completed solution code for the **forms.py**.

```
1  from django import forms
2
3  from .models import Booking
4
5  class BookingForm(forms.ModelForm):
6      class Meta:
7          model = Booking
8          fields = '__all__'
9
```

models.py

```
1  from django.db import models
2
3  # Create your models here.
4  class Booking(models.Model):
5      first_name = models.CharField(max_length = 200)
6      last_name = models.CharField(max_length = 200)
7      guest_count = models.IntegerField()
8      reservation_time = models.DateField(auto_now=True)
9      comments = models.CharField(max_length=1000)
```

admin.py

```
1  from django.contrib import admin
2  from .models import Booking
3
4  # Register your models here.
5  admin.site.register(Booking)
```
